

**MISMOUNTAINBOYS** is a historical band of the Italian country background, founded in 2005 and which has held more than 700 live concerts and self produced 7 albums to its name!

Well known and renewed both in Italy and abroad, **MISMOUNTAINBOYS** performs with an engaging and unique way different types of styles and sonorities: starting from the quick and aggressive bluegrass to singer-songwriter songs of Texan origin, from the most famous classic country hits to the western ballads, from the hillbilly to the folks protest songs. The main feature of our approach is the great flexibility and versatility of our repertoire, which can be tailored from time to time to meet the requests and organizational needs of every event (such as themed exhibitions, cultural events, countryside festivals etc...).

Our performances are rigorously live and carried out without the use of any external pre-recorded accompaniments.

The band has its own amplification audio system. Our exhibitions have a great choreographic impact, which together with the professionalism of the members, creates a dynamic and entertaining show.
